

INSTALLATION GUIDE

Please remove the original heat sink mounting bracket and CPU back plate on the motherboard.

Install NT07 AM2 CPU back plate on the backside of motherboard.

Apply the thermal interface material as shown.
(please clean the heatsink surface before apply the thermal interface material)

Install NT07 AM2 cooler and secure it.

Connect the fan connector on the motherboard.

INTRODUCTION

Developed with advanced design for use with cases that utilize mobile on desktop processors, the NT07-AM2 is the ideal replacement CPU cooler for those who needs quieter performance or has tight space requirements. Constructed out of aluminum block, the NT07-AM2 is capable of delivering superior heat absorbing ability than the average mobile CPU cooler of larger size. Mated with a carefully selected 80mm fan, with total height of only 37mm, it operates in impressively low noise level with plenty of airflow thanks to its smaller hub with improved fan blade design. The NT07-AM2 can be used in any enclosures (including the super-slim SilverStone LC19 and ML02) with satisfying results.

SPECIAL FEATURES

ENGLISH

- Support AMD Socket AM2 up to 65W
- Ideal for space limited chassis with 37mm height
- Smaller hub with improved fan blade design offers quieter and better performance
- Quick thermal absorbing extruded aluminum fins
- Easy installation design

DEUTSCH

- Unterstützt AMD Socket AM2 bis zu 65W
- Mit einer geringen Einbauhöhe von nur 37mm ist er ideal für Gehäuse mit begrenztem Platzangebot
- Verkleinerter Lüftermotor mit verbessertem Lüfterblätter Design ermöglicht einen leisen Betrieb und einen hohen Luftdurchsatz
- Schnell Wärme-ableitender Kupferkern mit herausragenden Aluminiumrippen
- Einfachste Installation

ITALIANO

- Supporta AMD Socket AM2 fino a 65W
- Con un'altezza di soli 37mm, è ideale per chassis a spazio limitato
- Hub più piccolo con design della ventola perfezionato per offrire una performance di flusso d'aria migliore e più silenziosa.
- Parte centrale in rame che garantisce veloce assorbimento di calore con lamelle in alluminio estruso.
- Facile progetto d'installazione

日本語

- AMD Socket AM2対応 CPUクーラー65Wまでをサポート
- 高さわずか37mmで、設置スペースの限られたシャーシに最適
- 小さめのハブとファンブレード設計の改善により、静かでより優れた送風性能
- 熱を素速く吸収する銅製センターおよび射出成型アルミニウムフィン
- インストールが容易な設計

FRANÇAIS

- Supporte les processeurs AMD Socket AM2 jusqu'au 65W
- Avec sa faible hauteur de 37mm, il est idéal pour les boîtiers à l'espace restreint
- Rotor plus petit avec une conception améliorée des pales du ventilateur offrant un plus grand flux d'air avec moins de nuisances sonores
- Centre en cuivre absorbant rapidement la chaleur avec des ailettes extrudées en aluminium
- Conçu pour être facile à intégrer

ESPAÑOL

- Admite AMD Socket AM2 hasta 65W
- Con su altura de solo 37mm, es ideal para chasis de espacio limitado
- Hub más pequeño y diseño del ventilador mejorado para flujo de aire mayor y más silencioso
- Centro de cobre con láminas de aluminio extruido que absorben rápidamente el calor.
- Fácil proyecto de montaje

русский

- Поддержка AMD Socket AM2 до 65W
- Идеален для корпусов с ограниченным внутренним пространством высотой 37 мм
- Уменьшенная втулка с лопастями усовершенствованной конструкции обеспечивают более эффективное охлаждение при низком уровне шума
- Быстро поглощающая тепло медная центральная часть с обрешеткой из штампованного алюминия
- Легко устанавливается

中文

- 支援AMD Socket AM2 處理器至65W
- 總高度只有37mm，適合用於有限空間的機殼
- 較大的風扇設計具有更安靜及較佳性能
- 一體成型散熱器
- 簡易安裝
