* To use emergency charging between devices, the phone or tablet's output port needs to support OTG output function.

** For charging, the USB combo connector should be used on device providing power.

*** When charging, the power is limited by Micro-B connector's output limit of 0.4A. So CPU02's efficiency is lower than charging cables included with mobile devices or battery chargers. The CPU02 also cannot be used to charge batteries from mobile phones.
