* 2.5" drive on center bracket may be difficult or impossible to install due to power supply cable interference, we recommend using 140mm deep or shorter modular power supply with flat cables.
** Maximum length for power supply is 150mm but we recommend 140mm deep power supply due to varying connector locations and the unique structure of RVZ03. Due to the use of internal power cord extension, we recommend not to exceed 800W when powering off a 110V outlet (no limit for 220V).
